EDUCATION

NIT JAIPUR

B-Tech Metallurgical and Material Eng. - **CGPA - 6.4**

Nov 2022 - Jan 2024

Jaipur, India

EXPERIENCE

Table-Mitra

CTO and Co-founder

Noida, India

Sept 2025 – Present

- Built and scaled **TableMitra** (tablemitra.com), a unified hotel operations platform actively used by **multiple live hotels**, enabling digital room-service ordering, reservations, and front-desk operations.
- Designed a **multi-property, real-time inventory system** for rooms, menus, and services, reducing availability mismatches and manual coordination errors by **98%**.
- Digitized room-service and telephone-based food ordering workflows, eliminating order drops caused by busy phone lines and unavailable-item confusion, resulting in an **estimated 10% increase in average order value (AOV)**.
- Architected real-time operational flows using **WebSockets** for order status, staff coordination, and notifications, significantly improving service turnaround time and guest experience.

Maxtron Innovation

Tech Lead – Full Stack

Noida, India

Jan 2025 – Sept 2025

- Led end-to-end architecture and development of **Gro8** (gro8.club), a syndicate-based investment platform connecting founders, investors and mentors. Delivered scalable backend using **Node.js**, **Express.js**, **MongoDB**, **Next.js** and **AWS** with **Nginx** for production-grade deployment.
- Architected and built **Axto** (axto.ai), a SaaS-based accessibility compliance tool aligned with European EAA standards. Integrated **Lighthouse** audits and implemented robust backend workflows with **Express.js**, **MongoDB** and **AWS**.
- Currently leading backend and mobile app development of **Ulalo**, a Web3-enabled global medical passport platform. Building cross-platform solutions using **React Native**, **Node.js** and **MongoDB**.

10Medz

Founding Engineer

Bhopal, India

Oct 2024 – Dec 2024

- Built a prescription-based medicine delivery platform enabling fulfillment within 10 minutes.
- Implemented secure uploads, phone OTP login and real-time order tracking using **WebSocket**.
- Engineered a scalable backend architecture to support high-concurrency transactions.

Gramzo

Full Stack Developer

Remote

Nov 2023 – Sept 2024

- Led a team of 5 to develop a cross-platform ordering system including a vendor app and user-facing website.
- Implemented real-time order placement and fulfillment between users and vendors using **Next.js** and **Node.js**.
- Built scalable backend services with **Express.js**, **MongoDB** and integrated state management using **Redux Toolkit**.

PROJECTS

FindCreators [🔗](#) | Next.js, Node.js, Express.js, MongoDB, Redis, WebSockets, Tailwind CSS

- A creator-brand collaboration platform enabling brands to discover, evaluate, and hire influencers for marketing campaigns and promotions.
- Creator Discovery System: Advanced filtering based on niche, audience demographics, engagement metrics, and platform reach.
- Real-Time Communication: WebSocket-based messaging and notifications between brands and creators for seamless coordination.
- Scalable Backend Architecture: Built with Node.js and MongoDB, optimized using Redis caching and secure role-based access control.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Go

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3, PWA, React Native

Backend: Node.js, Express.js, Fiber(Go), REST APIs, MongoDB, Mongoose, Redis, JWT, WebSocket, WebRTC

DevOps / Cloud: Docker, AWS (EC2, S3, Load Balancer, Elastic IP, CloudFront), Nginx, PM2

Automation / Tools: n8n, GramJS (Telegram), OpenAI API, Git, GitHub, Postman, VS Code, Cursor
